About Plagiarism Detection

Our AI-powered plagiarism scans offer three layers of text similarity detection: Identical, Minor Changes, and Paraphrased. Based on your scan settings we also provide insight on how much of the text you are not scanning for plagiarism (Omitted words).

● Identical

One to one exact word matches. [Learn more](#)

● Minor Changes

Words that hold nearly the same meaning but have a change to their form (e.g. "large" becomes "largely"). [Learn more](#)

● Paraphrased

Different words that hold the same meaning that replace the original content (e.g. 'large' becomes 'big') [Learn more](#)

● Omitted Words

The portion of text that is not being scanned for plagiarism based on the scan settings. (e.g. the 'Ignore quotations' setting is enabled and the document is 20% quotations making the omitted words percentage 20%) [Learn more](#)

Copyleaks Shared Data Hub

Our Shared Data Hub is a collection of millions of user-submitted documents that you can utilize as a scan resource and choose whether or not you would like to submit the file you are scanning into the Shared Data Hub. [Learn more](#)

Filtered and Excluded Results

The report will generate a complete list of results. There is always the option to exclude specific results that are not relevant. Note, by unchecking certain results, the similarity percentage may change. [Learn more](#)

Current Batch Results

These are the results displayed from the collection, or batch, of files uploaded for a scan at the same time. [Learn more](#)
